Activity Course: No
CIP Code: 13.1210
Assessment Mode: Pre/Post Test (75 Questions/75 Points)
Semester Taught: Fall
GE Category: None
Separate Lab: No
Awareness Course: No
Intensive Writing Course: No

Prerequisites: None

Educational Value
This course will be helpful to students who are interested in providing childcare in a home environment, a childcare center, and private preschools for children age's birth through age eight. Student's interested in careers in early childhood education could also benefit from this course.

Description
Introduction to the field of Early Childhood Education including history, philosophy, and the application of child development techniques. Includes assessment techniques for observing and recording behaviors, communication skills, guidance techniques, developmentally appropriate practices and the role of the teacher in early childhood settings. Observation and participation hours in a childhood setting required.

Supplies
None
Competencies and Performance Standards

1. Determine the scope and need for early childhood education.

Learning objectives
What you will learn as you master the competency:

a. Discuss the social factors that have contributed to the expansion of early childhood programs and brought early childhood education into the public consciousness.

b. Characterize the various types of early childhood programs.

c. Determine the many elements that contribute to the quality of an early childhood program.

d. Discuss the trends and projections that suggest what the future holds for early childhood education.

e. Classify the various early childhood programs in the community.

Performance Standards
Competence will be demonstrated:

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

Criteria - Performance will be satisfactory when:

- learner participates in discussions and activities about the expansion of early childhood.
- learner provides acceptable written responses that characterizes a quality early childhood program.

2. Characterize the similarities and differences of children in early childhood education.

Learning objectives
What you will learn as you master the competency:

a. Compare children's similarities and differences.

b. Examine the factors that contribute to the diversity among children include inborn traits and external factors.

c. Discuss the various needs children may have that help make them unique.

d. Recognize characteristics of children with motor, cognitive, learning, and other health problems, as well as gifted children.

Performance Standards
Competence will be demonstrated:

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

Criteria - Performance will be satisfactory when:

- learner provides acceptable written responses to questions about children with motor, cognitive, learning, and other health problems, as well as gifted children.
- learner participates in discussions and activities assigned designed to children with motor, cognitive, learning, and other health problems, as well as gifted children.
3. **Customize a plan to communicate, involve, and educate parents about early childhood education.**

   **Learning objectives**
   
   *What you will learn as you master the competency:*
   
   a. Explain what family systems theory means.
   
   b. Compare some of the changes the American family has undergone recently.
   
   c. List some of the specific needs families have in an early childhood program.
   
   d. Create a process for communicating with parents.
   
   e. Describe ways to involve parents in the early childhood program.
   
   f. Generate topics for parent education.

   **Performance Standards**

   *Competence will be demonstrated:*
   
   o in the completion of selected activities assigned by the instructor.
   
   o in the completion of objective examinations.
   
   o through class participation in discussions.
   
   o by reading the chapter material.

   **Criteria - Performance will be satisfactory when:**
   
   o learner provides acceptable written responses to questions about parents, and their involvement with the early childhood program.
   
   o learner participates in discussions and activities assigned.

4. **Compare qualities of good Early Childhood teachers/caregivers and understand the importance of staffing, training, professionalism and current issues concerning their profession.**

   **Learning objectives**

   *What you will learn as you master the competency:*
   
   a. Describe the personal qualities of an early childhood teacher or caregiver.
   
   b. Create a list of the variety of roles caregivers provide for the early childhood programs.
   
   c. Acquaint self with the different training possibilities and regulating entities that are associated with early childhood programs.
   
   d. Believe in importance of the code of ethics and the existence of professional organizations.
   
   e. Name some of the issues and dilemmas that face early childhood education.

   **Performance Standards**

   *Competence will be demonstrated:*
   
   o in the completion of selected activities assigned by the instructor.
   
   o in the completion of objective examinations.
   
   o through class participation in discussions.
   
   o by reading the chapter material.

   **Criteria - Performance will be satisfactory when:**
   
   o learner provides acceptable written responses to the importance of quality staff.
   
   o learner participates in discussions about professional development; including joining a professional organization.
5. **Compare rationale supporting Early Childhood Education.** Include information from various influential people, theorists, and their theories.

*Learning objectives*

*What you will learn as you master the competency:*

a. Determine how the writings and work of many individuals through history have contributed to our contemporary ideas about young children and early childhood education.

b. Compare the various theories and theorists that have helped us to understand the nature of young children.

c. Give examples of research that has proven the effectiveness of early education.

*Performance Standards*

*Competence will be demonstrated:*

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

*Criteria - Performance will be satisfactory when:*

- learner provides acceptable written responses comparing the work of theorists throughout history.
- learner participates in discussions and activities assigned.

6. **Select goals, objectives, and types of evaluation needed in early Childhood Education.**

*Learning objectives*

*What you will learn as you master the competency:*

a. Define goals as it pertains to evaluation of children.

b. Classify the different types of objectives.

c. Determine the importance of evaluation in early childhood education.

d. List the different types of observation techniques and instruments used.

*Performance Standards*

*Competence will be demonstrated:*

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

*Criteria - Performance will be satisfactory when:*

- learner provides acceptable written responses to questions about goals, objectives and evaluation techniques.
- learner participates in discussions and activities assigned.
7. **Examine the effects the physical environment and materials have on children in an Early Childhood Education Program.**

*Learning objectives*

*What you will learn as you master the competency:*

a. Determine the affects the physical environment has on both children and adults.

b. Communicate the importance of the indoor environment to support the development of young children.

c. Discuss the importance of the outdoor environment, how to maximize the potential, and make it safe for children with special needs.

d. Select developmentally appropriate equipment, with particular emphasis on the role of computers in early childhood programs.

e. Develop criteria for selecting appropriate materials for use in early childhood programs.

*Performance Standards*

*Competence will be demonstrated:*

- in the completion of selected activities assigned by the instructor.

- in the completion of objective examinations.

- through class participation in discussions.

- by reading the chapter material.

*Criteria - Performance will be satisfactory when:*

- learner provides acceptable written responses to effects the physical environment has on children.

- learner participates in discussions and activities assigned.

8. **Demonstrate how to develop a schedule, its components, and the types of curriculum that may be used.**

*Learning objectives*

*What you will learn as you master the competency:*

a. Compare the common components of the daily schedule in an early childhood program.

b. Examine some guidelines for setting an effective schedule.

c. Create a daily schedule for an early childhood program.

d. Demonstrate how to write different types of lesson plans, including the curriculum, units, daily, weekly, and monthly.

e. Explain what emergent curriculum provides.

*Performance Standards*

*Competence will be demonstrated:*

- in the completion of selected activities assigned by the instructor.

- in the completion of objective examinations.

- through class participation in discussions.

- by reading the chapter material.

*Criteria - Performance will be satisfactory when:*

- learner participates in discussions and activities assigned.

- learner provides acceptable written responses to concerns and considerations to make when creating schedules.
9. **Incorporate creative development activities throughout the curriculum including art, and music.**

**Learning objectives**

*What you will learn as you master the competency:*

a. Define and discuss some of the characteristics of creativity.
b. Describe how both the teacher's attitude and the physical environment are important in encouraging creativity in young children.
c. Discuss where creativity can flourish the most in an early childhood curriculum.
d. Describe how music is another element that fosters creativity.
e. List some factors that discourage and decrease creativity.

**Performance Standards**

*Competence will be demonstrated:*

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

*Criteria - Performance will be satisfactory when:*

- learner provides acceptable written responses about creativity, including how to enhance creativity in an early childhood curriculum.
- learner participates in discussions and activities involving music.

10. **Incorporate physical development activities throughout the curriculum. Include the senses, and gross and fine motor activities.**

**Learning objectives**

*What you will learn as you master the competency:*

a. Discuss the theories that explain physical development.
b. Describe the interrelated components of physical development.
c. Define sensory-perceptual development.
d. Create a list of early childhood activities that encourage and promote the use of the large muscles of the body.
e. Create a list of early childhood activities that encourage and promote the use of the small muscles of the body.
f. Develop a list of activities that promote sensory exploration and discrimination.
g. Incorporate activities that include learning to care for the body, in relation to nutrition, health, and safety.

**Performance Standards**

*Competence will be demonstrated:*

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

*Criteria - Performance will be satisfactory when:*

- learner provides acceptable written responses to physical development in the
curriculum.

- learner participates in discussions and activities that involve the senses, large and small muscles.

11. **Incorporate cognitive development activities throughout the curriculum. Include various views on cognitive development, math, and science activities.**

   **Learning objectives**
   
   *What you will learn as you master the competency:*
   
   a. Compare the three influential theoretical views of cognitive development: behaviorism, cognitive development theory, and information processing.
   
   b. Discuss cognition as it pertains to infants.
   
   c. Develop activities to help children acquire specific cognitive skills.
   
   d. Discuss the importance of incorporating math and science into the curriculum.

   **Performance Standards**
   
   *Competence will be demonstrated:*
   
   - in the completion of selected activities assigned by the instructor.
   - in the completion of objective examinations.
   - through class participation in discussions.
   - by reading the chapter material.

   *Criteria - Performance will be satisfactory when:*
   
   - learner participates in discussions and activities assigned.
   - learner provides acceptable written responses about cognitive development.

12. **Incorporate language development activities throughout the curriculum. Include the components of language, meaning and rules.**

   **Learning objectives**
   
   *What you will learn as you master the competency:*
   
   a. Compare the different divergent theoretical views of language development.
   
   b. Understand the components of language development.
   
   c. Develop effective strategies for teaching children a second language.
   
   d. Create activities that enhance language development, offer opportunities for language play, and reading and writing.

   **Performance Standards**
   
   *Competence will be demonstrated:*
   
   - in the completion of selected activities assigned by the instructor.
   - in the completion of objective examinations.
   - through class participation in discussions.
   - by reading the chapter material.

   *Criteria - Performance will be satisfactory when:*
   
   - learner provides acceptable written responses concerning language development.
   - learner participates in discussions and activities to enhance language development.
13. **Incorporate social development through the curriculum. Include various views, theories, and activities.**

   **Learning objectives**
   
   *What you will learn as you master the competency:*
   
   a. Compare theoretical views of how socialization takes place.
   b. Discuss the development of social competence.
   c. Be aware of the foundations of moral development and positive social skills and behaviors.
   d. Identify the two types of activities that promote positive social interaction.

   **Performance Standards**
   
   *Competence will be demonstrated:*
   
   o in the completion of selected activities assigned by the instructor.
   o in the completion of objective examinations.
   o through class participation in discussions.
   o by reading the chapter material.

   *Criteria - Performance will be satisfactory when:*
   
   o learner provides acceptable written responses concerning social development.
   o learner participates in discussions and activities that promotes positive social interaction.

14. **Develop daily routines, and group activities to meet the needs of the children in the Early Childhood Education Program.**

   **Learning objectives**
   
   *What you will learn as you master the competency:*
   
   a. Understand the importance of regular routine times: arrival and departure, meals, toileting and sleep.
   b. Examine some important factors that affect group behavior, particularly the developmental appropriateness of expectations and activities.
   c. Apply forethought and planning to help ensure an orderly classroom during specific time blocks within the daily schedule.
   d. Define and give an example of a transition.
   e. Consider occasions when either a planned or unplanned accident may occur.

   **Performance Standards**
   
   *Competence will be demonstrated:*
   
   o in the completion of selected activities assigned by the instructor.
   o in the completion of objective examinations.
   o through class participation in discussions.
   o by reading the chapter material.

   *Criteria - Performance will be satisfactory when:*
   
   o learner provides acceptable written responses to the importance of developing daily routines and group activities.
   o learner participates in discussions and activities assigned.
15. Examine various types of behavior management and appropriate guidance techniques.

Learning objectives

What you will learn as you master the competency:

a. Consider the kinds of behaviors we expect from children.
b. Examine workable philosophies of guidance.
c. Consider definitions and distinctions among words related to guidance and discipline.
d. Examine a variety of guidance techniques and when these are used most effectively.
e. Discuss two specific behavioral concerns, aggression and shyness.
f. Consider the underlying causes of misbehavior, factors that in both subtle and direct ways affect the way children behave.

Performance Standards

Competence will be demonstrated:

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

Criteria - Performance will be satisfactory when:

- learner provides acceptable written responses concerning behavior and guidance.
- learner participates in discussions and activities assigned.

Learning objectives

What you will learn as you master the competency:

b. Describe the possible sources of stress that exist in young children's lives.
c. Discuss the variety of adverse effects stress may have on children.
d. Create a list of techniques an early childhood teacher may use to help children cope with stress in their lives.

Performance Standards

Competence will be demonstrated:

- in the completion of selected activities assigned by the instructor.
- in the completion of objective examinations.
- through class participation in discussions.
- by reading the chapter material.

Criteria - Performance will be satisfactory when:

- learner provides acceptable written responses concerning stress and children.
- learner participates in discussions and activities assigned.
Types of Instruction
Direct instruction
Discussion
Collaborative Group Projects
Multi-Media Presentations

Grading Information

Grading Rationale
Grades will be determined with the following criteria being considered.
Class attendance/participation - Weight: 5%
Assignments – Weight: 45%
Examinations / tests - Weight: 35%
Post Test 15%
A pre and posttest will be given. Pre-test will not count.

Grading Scale
A  90-100%
B  80-89%
C  70-79%
D  60-69%
F  59% and below
