

EacMonsterNet Wireless Setup For iPad Devices

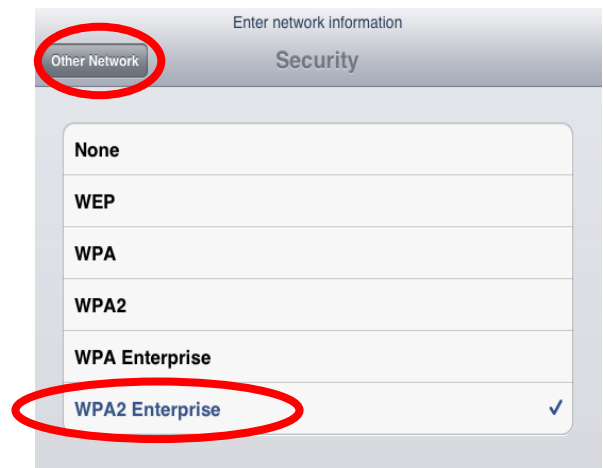

These instructions will help you set up your on campus wireless connection to EacMonsterNet. Before beginning, you must be on campus, in the location of a hot spot.

1. Go to Settings on your iPad. Select Wi-Fi, then Other...

8. Type: EacMonsterNet and select "Security."

9. First, choose WPA2 Enterprise, and then select the Other Network arrow in the top left corner.

Enter network information

Cancel Other Network Join

Name EacMonsterNet

Security WPA2 Enterprise >

Username Enter your Monster ID

Password ●●●●●●●●

10. Next, you'll need to type in your Monster ID and Gila Hank password. For non EAC students enter your affiliated email address and password.

11. Click "Accept."

Enter Password Certificate

 *.eac.edu
DigiCert High Assurance EV Root CA

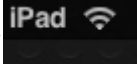

Not Verified

Description Client Authentication

Expires Feb 25, 2014 3:59:59 PM

More Details >

Once you can see that your iPad is receiving a signal , you will be connected to the EacMonsterNet wireless network.

SPECIAL NOTE: There is a bug (or discontinuation of a previous feature) in iOS 5.x that may require some users to perform additional steps to establish connectivity with EAC's wireless network. In these cases, you may want to use the iPhone Configuration Utility (which also works for iPad) provided by Apple: <http://www.apple.com/support/iphone/enterprise/> This utility will allow you to select "Any (Enterprise)" as a security type (step 4 above), instead of WPA2 Enterprise. All other configuration settings remain the same.
